INDEX

Activation, antidromic and synaptic, of motoneurons, 483
——, steady potential changes during, 273
Active phase of end-plate potential, 395
Afferent projections through ventrolateral funiculi, 133
After-positivity in geniculate, 258
ALLEN, M. See ANDY, O. J., 51
Amygdaloid seizures, 51
Anal sphincter, reflex activity of, 679
ANAND, B. K., MALHOTRA, C. L., SINGH, B., and DUA, S. Cerebellar projections to limbic system, 451
ANDY, O. J., BONN, P., CHINN, R. McC., and ALLEN, M. Blood pressure alterations secondary to amygdaloid and periamygdaloid after-discharges, 51
Anterior sigmoid gyrus response, 573
Asphyxia, spinal transection and GSR, 98
Auditory cortex, effect of ablation on sound discrimination, 374
—— neurons, interaction of, 603
—— —— in CNS, 343

BAKER, F. See STARK, L., 156
Behavior changes after caudate lesions, 524
BISHOP, B. Reflex activity of external anal sphincter of cat, 679
Blood pressure changes and seizures, 51
BONN, P. See ANDY, O. J., 51
Brain, effect of prolonged stimulation of, 458
—— influence on spinal sensory paths, 321
—— lesions and optokinetic nystagmus, 297
—— stem, eye movements evoked from, 666
—— —— seizures and reticular stimulation, 633
BROOKHART, J. M. See MACHNE, X., 483

Callosal connections, organization of, 504
Cardiac ganglion, syncytial neurons of, 554
CARPENTER, M. B., FABREGA, H., and GLINSMANN, W. Physiological deficits occurring with lesions of labyrinth and fastigial nuclei, 222
Caudate lesions and behavior, 524
Cell activity in sodium-free solutions, 693
Cerebellar cortex, optically evoked potentials in, 61
—— optic potentials, 61
—— projections to limbic system, 451
Cerebral cortex, auditory neurons in, 343
—— lesions and optokinetic nystagmus, 297
—— response of anterior sigmoid gyrus, 573
—— —— in somatic area II, 16
CERF, J. A. See KOKETSU, K., 177, 693
CHINN, R. McC. See ANDY, O. J., 51
CHOW, K. L. See ORBACH, J., 195
Chronic epileptic foci, 285
Cochlear DC potential, 149
COHEN, M. I. and WANG, S. C. Respiratory neuronal activity in pons of cat, 33
Colored light, selective adaptation to, 704
Conditioned reflex activity, effect of stimulation on, 633
—— —— and conditional stimuli, 428
Cone action potential, origin of, 102
Cortical activation, slow changes during, 273
—— and reticular conditioning, 633
—— response and visual afferents, 2
—— —— evoked by geniculate stimulation, 112
